

THE PREMIUM
DECK COVERING
FOR BOATS
AND YACHTS

NUTEAK LOOKS LIKE TEAK, FEELS LIKE TEAK AND OFFERS BEST CHARACTERISTICS AND MANY ADVANTAGES

Welcome at the deck covering of the 21st century— Nuteak outlasts every teak deck covering and looks year after year like freshly installed. In boatbuilding nowadays numerous progressive modern materials are used. Carbon and glass fibres care for structural resistance, Kevlar increases the elongation at break of our ropes and sails as well as the lifetime of products, whereas stainless steel assures that rust is a thing of the past.

LONG LIFETIME AND FREEDOM FROM MAINTENANCE

As the material is UV-stabilised and completely coloured, it keeps its classical appearance over many years. It is free from maintenance and insensitive to stains, mould, mildew and fading. In contrast to wood no oiling, painting, sanding or stripping is required. It is simply cleaned with water and soap.

FOR SELF-INSTALLATION

Our unique double pile system with tongue and groove connection makes NUTEAK to the easiest product for installation — also for do-it-yourselfers.

PREFABRICATED DECK PANELS

The prefabricated deck panels, which are ready for mounting, can be ordered by using templates for the areas to be covered. Contact us!

COMPLETE INSTALLATION

Available in many regions. Please simply call us for further information..

CHARACTERISTICS

The Nuteak planks have a width of 45, 60 and 125 mm with an integrated black or white joint edge. Thus coverings for all boat and ship sizes can be produced. The natural grain of light teak gives your boat a wonderful look.

- 1 Authentic nautical look
- 2 Quality design & production
- 3 Very resistant
- 4 Easy to care

ADVANTAGES

Our premium deck coverings are a wonderful alternative for a teak deck covering and can be installed on almost all surfaces – also on glass fibres, steel and wood. The covering is even in wet condition amazingly slip-resistant. The material is more cost-effective than teak wood and easier as well as quicker to install. The easy care and natural look make Nuteak very attractive. It is not fading and easy to clean. Due to its durability Nuteak still offers a high quality after many years and looks like new:

- ✓ Almost maintenance-free
- ✓ Very natural look and feel
- ✓ Fully UV-stabilised
- ✓ Anti-fungal, no corrosions
- ✓ Easy to install
- ✓ Black or white joint edges
- ✓ Can be cleaned with a high-pressure cleaner
- ✓ 20 years limited warranty
